

Icon Design for Chempure

I had the opportunity to design an icon for Chempure, an established chemical company with 81 years of history. Following detailed guidance from the CEO, I crafted a logo that reflects the company's legacy and its association with chemistry. The design features a hexagonal shape with sharp edges, symbolizing the precision and structure found in chemical compounds. The final design was successfully approved and aligned with Chempure's brand identity.

"C" stands for Chempure

The logo, designed in hexagonal shapes, represents the benzene structure in chemistry

The three lines within the hexagon symbolize the double bonds in a benzene ring

The sharpened edge of the shape, resembling a box, represents our packaging of chemicals.
